# Demorad Setup Guide
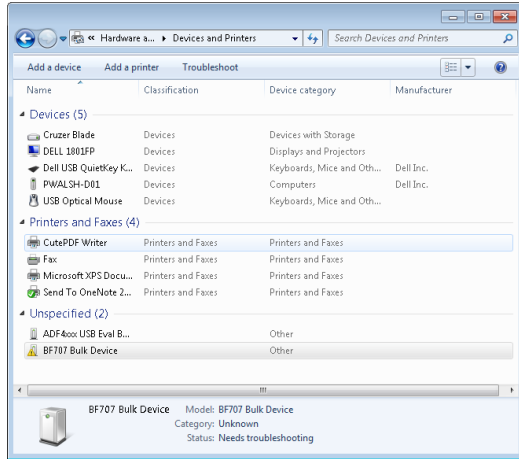

► Installing drivers for Demorad

- Power up the Demorad and connect to it via Mini USB port.
- Unzip the ADI_Demo_Driver.zip in the Software folder.
- Find the "BF707 Bulk Device" in your Control Panel Devices and Printers window.
- Open the Properties of the device.
  - Edit the properties to manually install the drivers from the unzipped folder of drivers.
  - More detail on page 2.
- Run the DemoRadTool-x32.exe file.
